STEERABLE LIFT AXLE SUSPENSION SYSTEM

SL13

The **SL13** steerable lift axle suspension serves as our most popular rated capacity. Its shorter packaging space allows it to be installed on critical mounting spacing. It is lightweight yet durable and ideal for dump, mixer, refuse, heavy-haul and critical mounting space applications. It features adjustable ride height and frame width for installation and / or inventory versatility.

- 13,500 pound suspension capacity
- Ride heights up to 17 inches
- Ten stud hub for 19.5, 22.5 and 24.5 in. wheels
- Package space: 22.1 inches
- Custom engineering available for specific customer requirements
- 5-year limited warranty*

* Contact your local W&C representative for complete warranty terms, conditions and limitations.

Value-added options and critical dimensions

Air Disc Brake

- Better stopping power
- Higher and consistent brake torque output
- Increased service intervals (depending on the application)

Pre-Plumbing System

- Fewer fittings reduces leak potential
- Better response when air is engaged
- Helps save time and money during the installation
- 100 percent leak tested at the factory

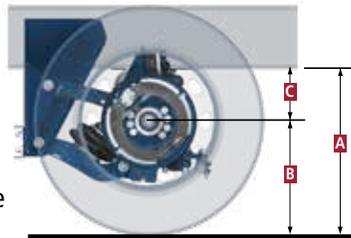

Ride Height Adjustability

- Accomplished through interchangeable lower air spring plate
- Can also be used to limit lift if ride height and driveline clearance fall within allowable criteria

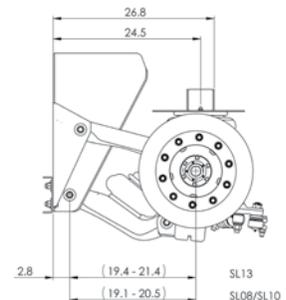

Ride Height Measurement Concept

- A.** Loaded Ground To Frame (GTF) Measurement
- B.** Static Loaded Radius (SLR) of tire
- C.** Ride Height ($A - B = C$)

Package Space Dimension

*Actual product performance may vary depending upon vehicle configuration, operation, service and other factors.
All applications must comply with applicable specifications from W&C and the respective vehicle manufacturer.
Contact W&C for additional details regarding specifications, applications, capacities, and operation, service and maintenance instructions.*
